

Formspark and GDPR

The General Data Protection Regulation (GDPR) is a European privacy law that went into effect on May 25, 2018. The purpose of GDPR is to protect the private information of EU citizens and give them more control over their personal data. These data protection laws require businesses to process an individual's personal data fairly and lawfully, allow individuals to exercise legal rights in respect of their personal data (for example, to access, correct or delete their personal data at any time), and ensure appropriate security protections are put in place to protect the personal data they process.

The GDPR applies to all businesses and individuals based in the EU and to those outside the EU that process the personal data of EU individuals. Personal data, as defined by the GDPR, is any information relating to an identified or identifiable natural person. This includes data that is obviously personal (such as a name or email address) as well as data that can be used to identify an individual indirectly (such as an IP address).

Article 4 of the GDPR defines data controllers and data processors as:

Controller

The natural or legal person, public authority, agency or other body which, alone or jointly with others, determines the purposes and means of the processing of personal data; where the purposes and means of such processing are determined by Union or Member State law, the controller or the specific criteria for its nomination may be provided for by Union or Member State law.

Processor

A natural or legal person, public authority, agency or another body which processes personal data on behalf of the controller.

Formspark as a Data Controller

We ask and store your email address to be able to authenticate you and send email notifications. You are not required, nor do you have the option, to give us any additional personal information.

We do not share, sell, rent, or trade personal information with any third party.

Formspark as a Data Processor

It is your responsibility as a data controller to ensure that any personal information you collect via our service is GDPR compliant.

Formspark is not to be used to collect:

- Children's personal information
- Personal health information
- Personal criminal history

Data removal

To exercise your rights and make a request to change or permanently delete your data from Formspark, please contact support@byteboomers.com.
